## **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

None of the references discloses alone or in combination an optical switch including a rotating mirror that is positioned at around the central point and turns on a turning shaft extending in a direction parallel with the substrate; bars that support the rotating mirror to rotate and an electrostatic force generating part that supplies a drive force to the rotating mirror, in combination with the remaining claimed limitations.

The most relevant references, Little et al. (U.S. Patent 6,396,976) disclose a 2D optical switch using MEMS. Zhang et al. (U.S. Patent 6,757,457) disclose an improved optical switching speed. And Zhang et al. (U.S. Patent 6,763,158) disclose molecular systems for electric field activated switches. However, there are no disclosures in the documents cited disclose or suggest the above limitations of the claimed invention.

Claims 1-15 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
